January 28, 2015

Articles and notes in mathematics published by Erik Christensen

LECTURE NOTES:

[1]
Matematik for biologer.
Mathematics for biologists, 178 pages. 1978.

[2]
Konvekse mængder i $\mathbb{R}^n$, 106 sider, 2001.
Lectures on convex sets in $\mathbb{R}^n$, for economics students, 106 pages, 2001.

CONTRIBUTIONS TO THE DANISH ENCYCLOPEDIA:

In total 4.

THESIS FOR THE DR. SCIENCE DEGREE:

Perturbationer af operatoralgebraer,
Matematisk Institut Københavns Universitet VII + 43 sider, 1984.
Perturbations of operator algebras, 50 p.

1. ARTICLES PUBLISHED IN REFEREED INTERNATIONAL JOURNALS OR PROCEEDINGS:

[1]
Non-commutative Integration for Montone Sequentially Closed C* - algebras, Math. Scand. 31 (1972), 171 - 190.

[2]
Perturbations of Type I von Neumann Algebras, J. London Math. Soc. 9 (1975), 395 -405.

[3]
Perturbations of Operator Algebras, Invent. Math. 43 (1977), 1 - 13.

[4]
Perturbations of Operator Algebras II, Indiana Univ. Math. J. 26 (1977), 891 - 904.

[5]
Extensions of Derivations, J. Funct. Anal. 27 (1978), 234 -247.

2

[6]
Derivations of Nest Algebras, Math. Ann. 229 (1977), 151 -161.

[7]
Sub - Algebras of a Finite Algebra, Math. Ann. 243 (1979), 17 - 29.

[8]
Near Inclusions of C*-algebras, Acta. Math. (1980), 249 -265.

[9]
Generators of Semigroups of Completely Positive Maps, Comm. Math. Phys. 62 (1978), 167 - 171.

[10]
Cohomology of Operator Algebras and Quantum Dynamical Semigroups, J. London Math. Soc. 20 (1979), 358 - 368. In collaboration with D. E. Evans, Cardiff.

[11]
Commutants of Nest Algebras modulo the Compact Operators, Invent. Math. 56 (1980), 113 - 117. In collaboration with C. Peligrad, University of Kansas, USA.

[12]
Extensions of Derivations II, Math. Scand. 50 (1982), 111 - 122.

[13]
On Non–selfadjoint Representations of C* -algebras, Amer. J. Math. 103 (1981), 817 - 833.

[14]
Derivations and their relation to Perturbations of Operator Algebras, Amer. Math. Soc. Symp. 38 (2) (1982), 261 - 273.

[15]
Measures on Projections and Physical States, Comm. Math. Phys. 86 (1982), 529 - 538.

[16]
Completely Order-isomorphic and Close C* -algebras need not be * -isomorphic, Bull. London Math. Soc. 15 (1983), 604 - 610. In collaboration with M.-D. Choi, University of Toronto, Canada.

[17]
Properly Infinite AW* -algebras are Monotone Sequentially Closed, Bull. London Math. Soc. 16 (1984), 407 - 410. In collaboration with G. K. Pedersen, Copenhagen.

[18]
Similarities of II-1 Factors with Property Gamma, J. Oper. Th. 15 (1986), 281 - 288.

[19]
Representations of Completely Bounded Multilinear Operators, J. Funct. Anal. 72 (1987), 151 - 181. In collaboration with A. M. Sinclair, University of Edinburgh.

[20]
The Algebra of Generalized Compacts associated with a von Neumann Algebra, Operator Theory: Advances and Applications, 24 (1987), 51 - 58.

[21]
Close Operator Algebras, in Deformation Theory of Algebras and Structures and Applications, M. Hazewinkel & M. Gerstenhaber, NATO ASI Series 247 (1988), 537 - 556, Kluwer Dordrecht.

[22]
Completely Bounded Multilinear Maps and C* -algebraic Cohomology, Invent. Math. 90 (1987), 279 - 296. In collaboration with E. G. Effros, University of California Los Angeles, and A. M. Sinclair, University of Edinburgh.

[23]
On the Vanishing of $H_n(A, A^*)$ for certain C* -algebras, Pacific J. Math. 137 (1989), 55 - 63. In collaboration with A. M. Sinclair, University of Edinburgh.

[24]
Completely Bounded Isomorphisms of Injective von Neumann Algebras, Proc. Edinburgh Math. Soc. 32 (1989), 317 - 327. In collaboration with A. M. Sinclair, University of Edinburgh.

[25]
A Survey of Completely Bounded Operators, Bull. London Math. Soc. 21 (1989), 417 - 448. In collaboration with A. M. Sinclair, University of Edinburgh.

[26]
On the Cohomology Groups of certain Finite von Neumann Algebras, Math. Ann. 307 (1997) 71 - 92. In collaboration with Florin Pop, University of New Mexico, Allan M. Sinclair, University of Edinburgh, Roger R. Smith Texas A & M,

[27]
Universally Bounded Operators of von Neumann Algebras of Type II-1, Algebraic Methods in Operator Theory, 195 - 204, ed. R. Curto and P. E. T. Jrgensen, Birkhauser 1994.

[28]
On von Neumann Algebras which are Complemented Subspaces of B(H). In collaboration with A. M. Sinclair, University of Edinburgh, J. Functional Analysis 122 (1994) 91 - 102.

[29]
Module Mappings into von Neumann Algebras and Injectivity, In collaboration with A. M. Sinclair, University of Edinburgh, Proc. London Math. Soc. 71 (1995) 618 -640.

[30]
A Cohomological Characterization of Approximately Finite Dimensional von Neumann Algebras, In collaboration with A. M. Sinclair, University of Edinburgh, Operator algebras and quantum field theory, International Press (1997) 323 - 329.

[31]
Two Generalizations of the Gleason-Kahane-Zelazko Theorem, Pac. J. Math. 177 (1997), 27 - 32.

[32]
On Invertibility Preserving Linear Mappings, Simultaneous Triangularization and Property L, Linear Alg. App. 301 (1999), 153 - 170.

[33]
Finite von Neumann Algebra Factors with Property Gamma, J. Funct. Anal. 186 (2001), 366 - 380.

[34]
Hochschild Cohomology of Factors with Property Gamma, Ann. Math. 158 (2003), 635 – 659. In collaboration with F. Pop, A. M. Sinclair, R. R. Smith.

[35]
On some problems studied by R. V. Kadison. Acta Math. Sinica, English Series, 19 (2003), 523 – 534.

[36]
Property Gamma Factors and the Hochschild Cohomology Problem, Proc. Nat. Acad. Sci. USA. 100 (2003), 3865 – 3869. In collaboration with F. Pop, Wagner College NY, A. M. Sinclair, University of Edinburgh og R. R. Smith, Texas A & M University.

[37]
Metrics on Group C*-algebras and a Non Commutative Arzelà-Ascoli Theorem, J. Functional Analysis 214 (2004), 247 – 259. In collaboration with Cristina Antonescu.

[38]
Spectral triples for AF C*-algebras and metrics on the Cantor set, J. Operator Theory 56 (2006), 17 – 46. In collaboration with Cristina Ivan.

[39]
Sums of two dimensional spectral triples, Math. Scand. 100, 2007, 35 – 60. In collaboration with Cristina Ivan, U. Hannover.

[40]
Dirac operators and spectral triples for some fractal sets built on curves, Advances in Math. 217, 2008, 42 – 78. In collaboration with Cristina Ivan, U. Hannover and Michel L. Lapidus, UC riverside.

[41]
Extensions and degenerations of spectral triples, Comm. Math Phys. 285, 2009, 925 – 955. In collaboration with Cristina Ivan, U. Hannover

[42]
The spatial isomorphism problem for close separable nuclear C*-algebras, PNAS 107, 2010, 587-591. In collaboration with A. M. Sinclair, Edinburgh, R. R. Smith, Texas A & M, Stuart White, Glasgow, Wilhelm Winter, Nottingham.

[43]
Perturbations of C*-algebraic invariants, Geom. Funct. Anal. 20, 2010, 368 – 397. In collaboration with A. M. Sinclair, Edinburgh, R. R. Smith, Texas A & M, Stuart White, Glasgow.

[44]
Perturbations of nuclear C*-algebras. Acta Math., 208, 2012, 93 – 150.
In collaboration with A. M. Sinclair, Edinburgh, R. R. Smith Texas A
& M, Stuart White, Glasgow, Wilhelm Winter, Nottingham.

[45]
Spectral triples and the geometry of fractals. J. Noncommut. Geom.,
6, 2012, 249 – 274.
In collaboration with Cristina Ivan, MD Anderson Center Houston,
Elmar Schrohe, Hannover.

[46]
C*-algebras nearly contained in a type I C*-algebra. Canadian J.
Math., 65, 2013, 52 – 65. In collaboration with A. M. Sinclair, Ed-
inburgh, R. R. Smith Texas A & M, Stuart White, Glasgow.

[47]
Type II_1 factors satisfying the spatial isomorphism conjecture. PNAS,
109, 2012, 20338 – 20343. In collaboration with J. Cameron, Vassar
C., A. M. Sinclair, Edinburgh U., R. R. Smith Texas A & M, Stuart
White, Glasgow U., A. D. Wiggins, U. Michigan.

[48]
A remark on the similarity and perturbation problems. C. R. Math.
Acad. Sci. Soc. R. Can., 35, 2013, 70 – 76. In collaboration with J.
Cameron, Vassar C., A. M. Sinclair, Edinburgh U., R. R. Smith Texas
A & M, Stuart White, Glasgow U., A. D. Wiggins, U. Michigan.

[49]
Kadison-Kastler stable factors. Duke Math. J., 163, 2014, 2639 –
2686. In collaboration with J. Cameron, Vassar C., A. M. Sinclair,
Edinburgh U., R. R. Smith Texas A & M, Stuart White, Glasgow U.,
A. D. Wiggins, U. Michigan.

[50]
Von Neumann algebras as complemented subspaces of $B(H)$. Internat.
J. Math. 25, No. 11, 2014, doi: 10.1142/S0129167X14501079.
In collaboration with Liguang Wang, Qufu Normal University.

ARTICLES ACCEPTED FOR PUBLICATION:

[51]
On weakly D-differentiable operators, Expo. Math. arXiv:1303.7426.
