

## Nancy Hingston — Song Lyrics

### Verse 1:

In a world of curves and spaces wide,  
Where geodesics twist and gently glide,  
There's a light that guides us through the night—  
Nancy's vision shining bright.

### Pre-Chorus:

She walks where shortest paths converge,  
On winding roads where dreams emerge;  
Her quest to find a hidden trace,  
Loops returning to embrace.

### Chorus:

Oh Nancy, tracing through the unknown,  
Mapping secrets, making them your own.  
With every step, you show the way—  
Where closed loops wander, there you'll stay.

### Verse 2:

From smoothest hills to spaces strange,  
Through geometry's endless range,  
You chart the secrets, deep and grand,  
Where silent geodesics stand.

### Pre-Chorus:

In string topology's looping dance,  
You find new patterns, give dreams a chance;  
Algebra and shapes entwine,  
In worlds where numbers and visions align.

### Chorus:

Oh Nancy, tracing through the unknown,  
Mapping secrets, making them your own.  
With every step, you show the way—  
Where closed loops wander, there you'll stay.

### Bridge:

Honors earned and wisdom shared,  
In every hall your name declared;  
You light the path for those who try—  
We follow as you reach the sky.

### Chorus (repeat):

Oh Nancy, tracing through the unknown,  
Mapping secrets, making them your own.  
With every step, you show the way—  
Where closed loops wander, there you'll stay.

**Outro:**

So here's to you, with vision true,

Guiding us to something new.

Nancy, you draw the paths we pursue—

The world is brighter, thanks to you.
